Notices

Knowledge and best practice in this field are constantly changing. As new research and experience broaden our understanding, changes in research methods, professional practices, or medical treatment may become necessary.

Practitioners and researchers must always rely on their own experience and knowledge in evaluating and using any information, methods, compounds, or experiments described herein. In using such information or methods they should be mindful of their own safety and the safety of others, including parties for whom they have a professional responsibility.

To the fullest extent of the law, neither the Publisher nor the authors, contributors, or editors, assume any liability for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions, or ideas contained in the material herein.

Contents

List of Contributors	ix
Abbreviations and Notations	xi
1. Remote Sensing of Inland Waters: Background and Current State-of-the-Art	
<i>Igor Ogashawara, Deepak R. Mishra, and Anatoly A. Gitelson</i>	
1.1 Inland Waters	1
1.2 Remote Sensing of Inland Waters	3
1.3 Fundamental Bio-optical Properties	5
1.4 Bio-optical Models	11
1.4.1 Classification of Bio-optical Models	12
1.4.2 Performance of Bio-optical Models	14
1.5 Book Content	18
References	21
2. Radiative Transfer Theory for Inland Waters	
<i>Peter Gege</i>	
2.1 Introduction	25
2.2 Basic Principles	27
2.2.1 Interaction of Light with Matter	27
2.2.2 Radiometric Quantities	30
2.2.3 Radiative Transfer Equation	31
2.2.4 Inherent Optical Properties	33
2.2.5 From Microscopic to Macroscopic Material Parameters	35
2.3 Bio-optical Models	39
2.3.1 Water Composition	39
2.3.2 Apparent Optical Properties	45
2.3.3 AOP Models	47
2.4 Light Field Models	50
2.4.1 Incident Radiation	51
2.4.2 Water Surface Effects	53
2.4.3 Underwater Light Field	54
2.4.4 Fluorescence	57
2.4.5 Polarization	59
2.5 Conclusions	59
Acknowledgments	61
References	61

3. Atmospheric Correction for Inland Waters

*Wesley J. Moses, Sindy Sterckx, Marcos J. Montes,
Liesbeth De Keukelaere, and Els Knaeps*

3.1	Introduction	69
3.2	Challenges	70
3.2.1	Challenges Due to Physical and Bio-optical Properties	72
3.2.2	Challenges Due to Difficulties in Atmospheric Modeling	75
3.3	Existing Algorithms	78
3.3.1	Atmospheric Correction Algorithms	78
3.3.2	Adjacency Correction Algorithms	88
3.3.3	Case Study: Combined Atmospheric and Adjacency Correction	89
3.4	Conclusion	91
	Acknowledgments	94
	References	94

4. Bio-optical Modeling of Colored Dissolved Organic Matter

*Tiit Kutser, Sampsa Koponen, Kari Y. Kallio, Tonio Fincke,
and Birgot Paavel*

4.1	Carbon in Inland Waters	101
4.2	Optical Properties of CDOM	103
4.3	Remote Sensing of CDOM	106
4.4	CDOM Retrieval With Bio-optical Models	109
4.5	Final Considerations	121
	References	122

5. Bio-optical Modeling of Total Suspended Solids

*Claudia Giardino, Mariano Bresciani, Federica Braga,
Ilaria Cazzaniga, Liesbeth De Keukelaere, Els Knaeps,
and Vittorio E. Brando*

5.1	Introduction	129
5.2	Optical Properties of Particles	130
5.2.1	Relationship between IOPs and TSS	132
5.2.2	Remote Sensing Algorithms for TSS	135
5.3	Case Studies	138
5.3.1	MERIS time-series—Lake Garda	139
5.3.2	Airborne Imaging Spectrometry—Mantua lakes	141
5.3.3	Multitemporal OLI Data—Po River	145
5.4	Conclusions	148
	Acknowledgments	150
	References	150
	Further Reading	156

6. Bio-optical Modeling of Phytoplankton Chlorophyll-*a**Mark W. Matthews*

6.1 Introduction	157
6.2 Chlorophyll-<i>a</i>: The Fundamental Measure of Phytoplankton Biomass and Production	160
6.3 Optical Pathways to Estimate Phytoplankton Chlorophyll-<i>a</i>	162
6.3.1 Phytoplankton Absorption	163
6.3.2 Phytoplankton Fluorescence	169
6.3.3 Phytoplankton Scattering	174
6.4 Conclusion	181
Acknowledgments	182
References	182

7. Bio-optical Modeling of Sun-Induced Chlorophyll-*a* Fluorescence*Alexander A. Gilerson and Yannick Huot*

7.1 Introduction, Basic Concepts, and Current Knowledge	189
7.2 Modeling of Reflectance Spectra with Fluorescence	192
7.2.1 Remote Sensing Reflectance	192
7.2.2 Elastic Reflectance	193
7.2.3 Fluorescence Reflectance	193
7.2.4 Inherent Optical Properties and Attenuation Coefficients	195
7.3 Relationships Between the Fluorescence Magnitude and the Concentrations of Chlorophyll and Other Water Constituents	199
7.3.1 Simplified Fluorescence Model—Theoretical Considerations	199
7.3.2 Simplified Fluorescence Model—Comparison with Field Measurements	203
7.4 Retrieval of the Fluorescence Component from Reflectance Spectra	207
7.4.1 Combined Retrieval of the Fluorescence and Water Constituents	207
7.4.2 Fluorescence Line Height Algorithms and Their Limitations	211
7.4.3 Performance of Fluorescence Algorithms with Satellite Data	216
7.4.4 Retrieval of the Fluorescence Component from Polarimetric Hyperspectral Observations	222
7.4.5 Application of SICF to the Detection of Algal Blooms	224
7.5 Summary	225
Acknowledgments	226
References	226

8. Bio-optical Modeling of Phycocyanin

Linhai Li and Kaishan Song

8.1	Introduction	233
8.2	Theoretical Basis for Remote Sensing of Phycocyanin	235
8.3	Literature Review of Remote Sensing Algorithms of Phycocyanin	237
8.3.1	Empirical Algorithms	238
8.3.2	Semi-empirical Algorithms	238
8.3.3	Semi-analytical Algorithms	241
8.4	Evaluation of Representative Algorithms Using a Large Field Dataset	245
8.4.1	Description of the Field Dataset	245
8.4.2	Evaluation of the Estimation Accuracy	247
8.4.3	Evaluation of a Band Ratio Algorithm	249
8.4.4	Evaluation of Semi-analytical Models	250
8.4.5	Evaluation of Two Baseline Algorithms Using AOP and IOP	251
8.4.6	Discussion of Factors Influencing the Remote Estimation of Phycocyanin	252
8.5	Mapping PC Using Airborne Images	254
8.6	Summary and Future Work	257
	Acknowledgements	258
	References	258

9. Bio-optical Modeling and Remote Sensing of Aquatic Macrophytes

Tim J. Malthus

9.1	Introduction	263
9.2	Spectral Characteristics of Aquatic Macrophytes	265
9.3	Application of Remote Sensing Systems	274
9.4	Discrimination and Classification	283
9.5	Determination of Macrophyte Biophysical Properties	285
9.5.1	Use of Indices	286
9.6	Bio-optical Modeling of Aquatic Macrophytes	289
9.7	Discussion and Priorities for Further Research	294
9.7.1	In Situ Measurement of Spectral Signatures	295
9.7.2	Signature Analysis	296
9.7.3	Bio-optical Modeling	297
9.7.4	Relationships with Biophysical Properties	297
9.7.5	Inversion Algorithms	298
9.7.6	Assessment of Remote Sensing Platforms	298
9.7.7	Regional Assessment/Global Monitoring	299
9.7.8	Role in Management	300
	References	300
